

- Q 1. What is mean by Database?
- Q 2. What are different types of Databases?
- Q.3 What is difference between DMBS and RDBMS?
- Q.4 State the Examples of RDBMS?
- Q.5 What is difference between char and Varchar?
- Q.6 What is Difference between varchar and varchar2?
- Q.7 What is default size of char data type?
- Q.8 What is max size of varchar data type?
- Q.9 What are different types of SQL statement?
- Q.10 Under DDL which statements come?
- Q.11 Under DML which statements come?
- Q.12 Under DQL which statements come?
- Q.13 Under DCL which statements come?
- Q.14 Under TCL which statements come?
- Q.15 Write create table query syntax?
- Q.16 Which command is used to describe the structure of table?
- Q.17 Write insert query syntax?
- Q.18 Write delete query syntax?
- Q.19 Write update query syntax?
- Q.20 Write drop table Syntax?
- Q.21 Write truncate query syntax?
- Q.22 What is difference between Delete and Drop?

Q.23 What is difference between Delete and Truncate?

Q.24 How many values we can pass to IN operator?

Q.25 Which keyword is used to select distinct values from table?

Q.26 Which function is used to convert upper case character to Lower?

Q.27 Which function is used to convert lower case characters to Upper?

Q.28 Which function is used to Convert only first letter capital?

Q.29 Which function is used to find length of String?

Q.30 Which function is used to join two String values?

Q.31 Which function is used to find numeric position of a character in the given

String?

Q 32 What is use of trim () function?

Q.33 What is difference between round () and trunc () function?

Q.34 Which function is used to convert String to number?

Q.35 Which function is used to Convert String to Date?

Q.36 Which function is used to convert number to String?

Q.37 What is difference between NVL and NVL2 function?

Q.38 State the group function names?

Q.39 What is difference between count (\*), count (column name) and count (distinct column\_name)?

Q.40 Which clause is used to apply the condition on column while selecting data from table?

Q.41 Which clause is used to sort the result?

Q.42 What is use of having clause?

Q.43 What are different types of Constraints?

Q.44 What is difference between Primary key and foreign key?

Q.45 What is difference between Primary key and foreign key?

Q.46 What are different types of joins?

Q.47 What is output of inner join?

Q.48 What is output of left outer join?

Q.49 What is output of right outer join?

Q.50 What output of full outer join?

Q.51 What are different types of set Operators?

Q.52 What is necessary and sufficient conditions while using set operators?

Q.53 What is difference between Union and Union ALL?

Q.54 What is index and what are different types of Indexes?

Q.55 What is default port of Oracle? => Default port is 1521
